

ActiveBPEL Engine

THE OPEN SOURCE BPEL STANDARD

The **ActiveBPEL™ engine** is a commercial-grade open source product for building service-oriented applications. A comprehensive implementation of the BPEL standard, ActiveBPEL delivers unmatched Web services orchestration for use by:

- OSS solutions vendors
- IT organizations
- Vertical industry communities
- Academic institutions
- Advanced technology researchers

Aimed at SOA architects, Java developers, and Web services application engineers, the ActiveBPEL engine includes a rich set of product features, complete source code and useful management consoles. The ActiveBPEL engine is also the core technology for Active Endpoints' commercial BPEL products.

THE ACTIVEBPEL COMMUNITY

With tens of thousands of downloads representing thousands of organizations worldwide, ActiveBPEL has become the world's leading BPEL community. ActiveBPEL's primary objective is to accelerate the adoption of the BPEL standard within and across IT organizations.

ActiveBPEL is led by BPEL experts who are core members of the OASIS WSBPEL Technical Committee. We are committed to delivering high-productivity tools and enterprise-class servers to the BPEL user community.

The ActiveBPEL open source project is sponsored by Active Endpoints, Inc. The ActiveBPEL engine is licensed under the GNU General Public License.

WHAT IS BPEL?

BPEL (Business Process Execution Language) is the definitive standard for orchestrating information flows across Web services endpoints. Through its ActiveBPEL open source subsidiary, Active Endpoints is the leading provider of BPEL-based solutions.

THE ACTIVEBPEL COMMUNITY, COMBINING THE POWERS OF BPEL AND OPEN SOURCE

In addition to providing free, world-class BPEL technologies, the ActiveBPEL community provides a variety of valuable member services.

Validate your BPEL processes. Use the BPEL OnDemand Validation™ Service, a powerful hosted utility, to quickly validate your BPEL process definitions.

Learn the basics of BPEL. Enhance your team's BPEL proficiency through the BPEL Essentials™ Training course, a comprehensive introduction to the BPEL standard. BPEL Essentials features an online, instructor-led learning format designed to fit tight budgets and busy schedules.

Get certified in BPEL. Demonstrate your BPEL proficiency by becoming a Certified BPEL Engineer (CBE™). As the software industry's first certification benchmark for BPEL, the CBE exam is targeted at Web services developers and process analysts, and tests for proficiency across a broad range of BPEL topics.

Partner with our Professional Services team. Leverage our educational, consulting and mentoring services to ensure you have what you need to successfully use the ActiveBPEL engine.

Join the ActiveBPEL community. Interact with hundreds of your peers in the world's most active BPEL community. Get plugged into the BPEL experts, get help, and get involved!
