Finding an author’s h-index in Web of Science
Type the author’s last name and initials.

2. Chromik

3. Finish Search
Click on “Record Sets” to view sets of articles likely written by the same person.
Select the set(s) that are appropriate in identifying the author you are looking for and click on “View Records.”

Web of Science looks at several factors to create an author set, such as the similarities in the author name, subject matter, and bibliographies of the articles.
Click on “Create Citation Report” to view the author’s h-index.
