

# BD Twinpak™

Dual Cannula Device

Indispensable to  
human health

## Simplifying Needleless IV Access with a Truly Universal Device

The BD Twinpak is a truly universal IV access device, offering twice the performance of traditional methods. It features two cannulas in one shield: one red hub cannula for syringe filling and one clear blunt plastic cannula for safe split septum access. The Twinpak helps to streamline IV work flow and reduces the number of individual pieces, thereby saving time and reducing costs.

*Twice the  
Performance,  
Twice the  
Convenience*

# BD Twinpak™

## Dual Cannula Device

Working Together  
for Simplified,  
Convenient IV Access

### The Self-Contained Solution

BD™ Red Hub  
Cannula Syringe  
Filling Device:

*Provides Access to  
Vials and Ampules*

BD Twinpak Shield:  
*Holds Both Cannulas Securely*

BD™ Blunt  
Plastic Cannula:  
*Allows for Safe, Needleless  
Access to Split Septum  
Injection Sites*

Green Cap:  
*Protects / Covers  
BD Blunt Plastic  
Cannula Prior to Use*

### Red Hub Cannula

(Syringe Filling Device):

- **20G Metal Cannula**  
provides versatility in syringe filling from single- and multidose vials, ampules, and for other multiple access needs (e.g., reconstitution)
- **Blunt Tip Design**  
provides a safer alternative to a traditional, sharp needle, for syringe filling
- **Red Hub**  
easily identifies the syringe filling device

### Blunt Plastic Cannula

(with Green Cap):

- **Dual Side Ports**  
provide greater fluid dispersion in flushing and drug delivery
- **Center-Point Design**  
features tapered tip for less resistance during insertion
- **Universal Compatibility**  
used with Interlink®, Abbott LifeShield®, and McGaw SafeLine™ injection sites as well as vials designed for needleless access
- **Green Cap**  
provides easy identification and a protective cover for clear BD Blunt Plastic Cannula and can later be used to cover the Red Hub Cannula

*Secure Red Hub Cannula to the syringe. Remove shield.*

*After filling, passively re-shield the Red Hub Cannula.*

*Flip the BD Twinpak and attach the clear BD Blunt Plastic Cannula for split septum IV access.*
