

Liceo Classico "Gioacchino da Fiore" – Rende (CS)
Prof.ssa Fabiola Salerno – a.s. 20/21

A LITTLE GLOSSARY

1. CRISPR (Clustered Regularly Interspaced Short Palindromic Repeats)
2. DNA (DeoxyriboNucleic Acid)
3. RNA (RiboNucleic Acid)
4. Chromosome
5. Genome
6. Embryo
7. Bacterium
8. Virus
9. Immune System

a. The first stage of the development of an organism
b. A molecule that has roles in coding, decoding, regulating and expressing genes
c. It is a complex network of biological structures and processes designed to defend organisms
d. It is a parasite that replicates exclusively inside the cells of organism
e. A family of DNA segments containing short repeated sequences found in bacteria
f. A unicellular microorganism: some are good, some are bad
g. All the chromosomes contained in a cell
h. It is a DNA molecule with the genetic material of an organism
i. A double stranded molecule which contains the genetic information
